The Department of Modern Languages and Classics is offering an archaeological field school in Italy from July 27 to August 21, 2015 (or thereabouts). The field school is a 6.0 credit hour course and will be held onsite at the site of San Felice (Gravina in Puglia) and in the territories of Genzano di Lucania, Banzi, and Irsina (province of Potenza, Italy). Students will participate in an active, ongoing research project in the Basentello Valley of Puglia and Basilicata, which includes the regional field survey of a large territory on the border between Puglia and Basilicata in south central Italy. Students will be introduced to the basic principles and methodology of archaeological survey, archaeological recording, photography, finds analysis, faunal analysis, and digital mapping. Students will work in the field 5 days/week and will have their weekends free. Optional field trips will be organized to nearby archaeological sites such as Pompeii, Metapontum, Venosa, Matera, and Melfi.

Student applicants must have at least 3.0 credit hours in Classics or archaeology courses. The participation fee of \$2200.00 Canadian covers student meals, lodging, transportation while on the project, and equipment. Airfare to Italy and course tuition is NOT included in this fee. Students will stay in dormitory style lodging and eat dinners at local restaurants. For more information, please visit our websites at:
