

The Gorsebrook Research Institute for Atlantic Canada Studies at Saint Mary's University (SMU) is the regional hub for research and collaborative scholarship on Atlantic Canada. Our Atlantic Canada recognizes First Nation communities and their land sovereignty, the ethnic and cultural diversity of those who were settled as part of forced immigration and colonization, and those who are here by their own choice and agency. Its mandate is to provide an interdisciplinary research environment that facilitates exchanges and partnerships among researchers at SMU and affiliates from many different fields who can come together to improve understandings of Atlantic Canada.

Funding Opportunities

Research Grant (max. \$1,000)

For Saint Mary's University faculty or researchers working in partnership with SMU faculty who produce new knowledge that focuses on Atlantic Canada.

Conference Support Grant (max \$500.00)

For SMU faculty or researchers affiliated with SMU faculty to: 1) invite a guest speaker working on areas of research connected to Atlantic Canada; 2) support a researcher with an affiliation to SMU for expenses for technical support or services of an interpreter.

Partnerships Grant (max \$3,000)

For SMU faculty or researchers affiliated with SMU faculty to: 1) support the travel and accommodation of external researchers working on or wishing to develop a project on Atlantic Canada; 2) fund a community member with limited funding opportunities to collaborate on an innovative project linked to issues, challenges, and priorities identified in their own community.

Community Initiative Grant (max \$2,000)

For Atlantic Canada community-based projects from individuals working outside the university on issues, challenges, and priorities identified in their own community.

All applications must include:

- CV or resume in the case of Community Initiative Grant
- One-page proposal (max)
 - For academic researchers: a knowledge mobilisation plan, a short note of the expected outcomes, and a note about how this fits into a larger research agenda.
 - For community-based projects: a description of your project (what it is, what you will do) and a note about why this project matters for your community.
- Detailed budget/costings outline
- Identify the preferred grant stream

Closing date for applications is 15 November 2021 and must be emailed to:

gorsebrook@smu.ca
