

Co-operative Performance Indicator Project

October 2017

First of a series of webinars held in October with CPI pilot participants to discuss indicators and metrics for each co-operative principle for testing in Winter 2018.

Online reporting tool in development with the assistance of Atenea Acosta Vidales, Masters student, Data Analytics Department, Saint Mary's University. Funding is provided by Mitacs.

Project update presentations at recent conferences (ICA-CCR in Stirling, Scotland; CASC in Toronto; PRM in Guelph, Ontario) A number of articles on the project will be ready for publication in early 2018.

Our outreach activities continue with the Chilean government and co-operatives as well as researchers, co-operatorives, and interested organizations in Canada and the US.

Next Steps:

Working with Pilot Participants to determine indicators and metrics;

Launching beta version of CPI online tool for testing with pilot participants; and

Developing mini-case studies for CPA Canada on expanded reporting.
